Software Engineering Masterclass 2017/18 Assessment

This course is 100% coursework. The marks are assigned as follows:

Assignment	Marks %	Deadline
Masterclass	70	From week 9 onwards
Peer reviews	10	3.30pm, Friday of Week 12. Vision submission (Turnitin)
Reflective report	20	3.30pm, Friday of Week 12. Vision submission (Turnitin)

Masterclass

This is the focus of the course. You must choose a topic, with the agreement of the supervisor, and develop 2-3 hours worth of material – in some combination of lectures and labs - to teach it to your peers. Each masterclass will be assessed by two members of staff.

Peer Reviews

You are expected to attend the masterclasses of the other students on the course, and will be provided with peer review forms to give them feedback. You should submit at least three of these peer review forms via Turnitin and you will be assessed on the quality of your feedback.

Reflective report

After you deliver your masterclass, you will be expected to write 2-3 pages reflecting on how you felt the class went and what you would do to improve it.
